Graphing a name:

Using your favorite word processor and your preferred font, enter the name you are going to use. Set the page to landscape and enlarge the font so that it fills the page horizontally. Using a clipping program, clip the image and save as .jpg. Now you can bring in the image to a graphing program to chart the name.

If you do not have a graphing program, make the letters the size you want. The name may span multiple pages. Print out the name; put a sheet or sheets of graph paper over the name and chart it.
